

AKHILA P

Python Developer

📞 +91 9072554733 ✉️ akhilapadmanabhan2@gmail.com 🌐 [GitHub](#) 🌐 [LinkedIn](#) 📍 Malappuram, Kerala

SUMMARY

I am a dedicated and trustworthy Python Developer with hands-on experience in Django and Machine Learning. I enjoy learning new technologies and adapting to new situations. My background in psychology helps me understand user behavior and think logically while developing applications. I work well both independently and in a team, and I am self-motivated, flexible, and open to new challenges, with interest in AI and data-driven projects.

EXPERIENCE

Software Engineer Trainee

Hyson Services

📅 10/2023 - 05/2024 📍 Kochi

Digital solutions provider

- Contributed to Python and Django-based research and development
- Participated in software design and implementation

Python Developer Intern

Vass Systems

📅 08/2023 - 09/2023 📍 Calicut

Technology services company

- Trained in Django; worked with HTML, CSS, and JavaScript basics
- Gained exposure to product-based development

Data Science & ML Intern

Camerinfo PVT Ltd

📅 04/2023 - 10/2023 📍 Kochi

Data analytics and machine learning services

- Used machine learning to create models and make predictions.
- Worked on data preprocessing and visualization.
- Applied ML algorithms on sample datasets using Python.

PROJECTS

Automatic Attendance System

A project focused on automating attendance tracking using face recognition technology. Developed face recognition-based automated attendance tracking

- Python, OpenCV, Pandas, dlib

FinSight AI – Personal Finance Assistant (Mini Project)

A mini project aimed at assisting users with personal finance through AI. Built an AI-driven finance assistant using FastAPI and Groq API

- Python, FastAPI, Groq API, Pandas

Resume Analyzer & Auto Job Applying System

A project that automates the process of resume analysis and job applications. Developing NLP-based resume analysis and job matching automation.

- Python, FastAPI
